# **Technology at BlackRock**

Discover a  
different  
path.

**Our mission: Create  
better financial futures  
for our clients.**

**H**

**How?**

**We think  
beyond  
what's  
possible.**

# Help us build the investment technology platform of the future.

## **Portfolios run better on Aladdin.**

BlackRock is responsible for the financial well-being of governments, foundations, and people saving for retirement, their children's education, and hopes of a better life.

Aladdin helps make this possible through its mission: **To make the world's investing information transparent and actionable.**

Aladdin is more than a technology, it's an operating system for investment managers, traders, developers and more. It's a technology platform that runs the investment process end-to-end, provides analytics, and other software. BlackRock, as an asset manager is a user of Aladdin, as well as over 200+ financial services firms across the industry.

As a developer at BlackRock, you will be contributing to the world's leading investment management platform, and help our clients solve the most complex problems. BlackRock's purpose is to help more and more people experience financial well-being. The engineers at BlackRock make this possible through technology.

With over \$6 trillion assets under management,\* we have a unique responsibility and opportunity to make a real and measurable impact in the lives of countless people around the world who are investing in their futures – a responsibility that is woven deep into our fabric at BlackRock. No force has a greater impact on our industry than technology.

As technologists, we are driving the digitisation of our industry as we build and refine the most sophisticated risk management platform in the world. Enter Aladdin. Aladdin's difference is that all the data is managed in one place, providing a broad and powerful platform that we've used not just to manage our own portfolios, but have built a business around selling our technology to other firms around the world.

But our technology is nothing without the people behind it. When we combine the power of people with the power of technology, we amplify our ability to create better outcomes for our clients, shareholders and society alike.

\* Source: BlackRock. Based on \$6.84 trillion in AUM as of 6/30/19.

**Be yourself.  
Be valued  
for it.**

We believe that our culture – one in which inclusion and belonging are paramount, creates room for all employees to bring their fullest selves to every conversation, every effort, every day.

**We're looking for the  
bravest and brightest  
engineering minds  
to help solve the  
world's most complex  
financial challenges.**

So leave your comfort zone and bring your ideas to build on the collective intelligence of one of the largest FinTech firms in the world.

# We're solving some of these problems every day by...

# 1

Scraping social media for live market intelligence

# 2

Forecasting economic recovery

# 3

Leveraging big data to understand the impact of global events

# 4

Advancing important social & environmental causes using machine learning

# Ready to drive real change?

## Full-Time Analyst Programme

Our Full-Time Analyst Programme is a two-year experiential journey which begins with a two-week orientation in New York City. Following orientation, Analysts return to their home office location and participate in ongoing training and professional development throughout the programme.

**Eligible applicants:** Undergraduate students graduating between January 2020 and July 2020. Master's students graduating between January 2020 and December 2020.

**Application deadline:**

**Software Engineering** – 1 December 2019;

**Investments** – 21 October 2019;

**All other businesses** – 8 November 2019

## Summer Analyst Programme

Our Summer Analyst Programme is an eight-week internship designed to provide you with an exciting, supportive and fun experience which mirrors life as an Analyst at BlackRock. You'll have real-world responsibilities during the summer, in addition to participating in professional development, networking and social events.

**Eligible applicants:** Undergraduate students graduating between January 2021 and July 2021. Master's students graduating between January 2021 and December 2021.

**Application deadline:**

**Software Engineering** – 1 December 2019;

**Investments** – 21 October 2019;

**All other businesses** – 8 November 2019

## Placement Programme

A longer term internship that allows you to develop new skills and gain experience within a business. Placements available in Edinburgh (Aladdin Client Services and Technology Support) and in London (Software Engineering and Relationship Management & Sales).

**Eligible applicants:** Students graduating in 2021 for a 6-month placement and students graduating in 2022 for a 12-month placement.

**Application deadline:** 8 November 2019

## Spring Insight Programme

As part of this week-long programme, you'll experience life at BlackRock through class room sessions, work-shadowing, networking and social events.

**Eligible applicants:** Undergraduate students graduating between January 2022 and July 2022. Master's students graduating between January 2022 and December 2022.

**Application deadline:** 1 December 2019
